

Maximilian (Max) J. Gebauer

Philadelphia, Pennsylvania | gebauerm@sas.upenn.edu | github.com/Max-Gebauer

EDUCATION

University of Pennsylvania Ph.D. Candidate, Philosophy Areas of specialization: Philosophy of Science; Bayesianism. Areas of competence: Political Philosophy; Environmental Philosophy.	Aug. 2022 - expected Spring 2027
The Wharton School, University of Pennsylvania M.A., Statistics & Data Science Thesis: <i>Sparse Control Selection For Spatial Epidemiological Data: Double Lasso And County COVID-19 Mortality.</i>	May 2026
Washington and Lee University B.A., Philosophy & Poverty and Human Capability Studies, <i>magna cum laude</i> ; Honors in Philosophy	May 2022
University of Oxford, Mansfield College Visiting Student Programme	Fall 2020 - Summer 2021

FORTHCOMING PUBLICATION

"Bayesian Practice and the Persistence of Inductive Risk" <i>Philosophy of Science</i> , forthcoming.	Forthcoming
---	-------------

WORKING PAPERS

"Opponent-Adjusted Evaluation of NFL Pass Blocking and Pass Rushing Performance" Jonathan Pipping-Gamón, Maximilian J. Gebauer, Victoria Lee, Kenny Watts, and Abraham J. Wyner. Interpretable ridge-regularized Bradley-Terry models for player-level pass-blocking and pass-rushing evaluation using opponent-dependent tracking interactions. arXiv preprint Repository	Revisions
FAIR xwOBA Maximilian J. Gebauer. A player-trait-free model of expected weighted on-base average in Major League Baseball that outperformed the declared Statcast comparators across six rolling held-out development seasons and supports new analysis of the game value associated with Sprint Speed. Published article and results Repository	Public release, Aug. 2026

RESEARCH & PROFESSIONAL EXPERIENCE

Technical Lead, Wharton Analytics Fellows Built reproducible data-processing and predictive-modeling workflows for confidential applied research.	Dec. 2025 - May 2026
Summer Lab Associate, Wharton Sports Analytics and Business Initiative Developed dynamic sports-performance models, advised student research projects, and taught R programming.	Summer 2025
Graduate Mentor, Perry World House Mentored an undergraduate research team on quantitative approaches in climate governance.	Sept. 2024 - Feb. 2025
Intern, Center for Ethics and the Rule of Law Coauthored white papers combining quantitative and qualitative analysis of proposed FISA Section 702 reforms.	June - Aug. 2023
Intern, U.S. Federal District Court Produced analytical research for legal-academic partnerships.	May - Oct. 2020

TEACHING EXPERIENCE

Instructor and Teaching Assistant, University of Pennsylvania Instructor of record for Philosophy of Science and Introductory Statistics. Teaching-assistant portfolio: Philosophy of Science, Introduction to Logic, Bioethics, Saving the Planet: Tools for the Climate Emergency, Modern Data Mining, Applied Bayesian Modeling, Applied Regression Analysis for Health Policy Research, and Introduction to Statistics for Health Policy.	2023 - present
Teaching Fellow, Wharton Data Science Academy Taught high school students in an intensive summer program; delivered lectures on neural networks and ensemble methods, advised student projects, and supported assignments.	Summer 2026
Teaching Assistant, Wharton Moneyball Academy Advised high school student projects in sports statistics and provided coding and analytical support in the Philadelphia and San Francisco programs.	Summer 2025

SELECTED TALKS

"Approximating Posterior Distributions with Variational Bayes" Applied Bayesian Modeling.	2025
"A Dynamic Rating Scheme for NFL Pass Rushers" New England Symposium for Statistics in Sports; Wharton Sport Analytics and Business Summit.	2025
"Judgment and Decision-making under Uncertainty" Repairing the Planet: Tools for the Climate Emergency.	2025
"Expected Utility Maximization and Environmental Decision-making" Repairing the Planet: Tools for the Climate Emergency.	2025

ACADEMIC LEADERSHIP

- Chair, "AI as Method" symposium, 29th Biennial Meeting of the Philosophy of Science Association, 2024.
- Chair, "Applied Ethics" colloquium, 119th Annual Meeting of the Eastern Division of the American Philosophical Association, 2023.
- Co-developed a new introductory logic course at the University of Pennsylvania, 2024.

SELECTED COURSEWORK & RESEARCH

Statistics & Data Science Applied Regression; Bayesian Modeling; Data Mining; Observational Studies; Probability; Statistical Computing; Forecasting & Time Series; Non-parametric Methods.	Graduate coursework
Philosophy Philosophy of Science; Mathematical Logic; Logic; Political Philosophy; Metaethics; Contemporary Ethical Theory; Proseminar; Kant and the a priori; Modern Political Philosophy; Epistemology and Perception.	Graduate coursework
Sparse Control Selection For Spatial Epidemiological Data Applied post-double-selection LASSO with a negative-binomial regression model and Markov random field spatial controls to investigate the association between U.S. county-level partisanship and COVID-19 mortality.	M.A. thesis

AWARDS & FELLOWSHIPS

- Perry World House Graduate Fellow, 2025-26.
- Fishman Fellowship, University of Pennsylvania, 2022-present.
- Benjamin Franklin Fellowship, University of Pennsylvania, 2022-present.
- Fontaine Graduate Fellowship, University of Pennsylvania, 2022-present.
- Dissertation Research Award, University of Pennsylvania, 2025.
- Edward Dodd Award; Charles Thomas Boggs Prize; The Young Scholarship; William Wells Chaffin Memorial Scholarship, Washington and Lee University, 2022.
- The Grenader Family Prize, Mansfield College, University of Oxford, 2020.

METHODS & SOFTWARE

Proficient in R, Stan, and LaTeX; familiar with Python, Excel, and Stata. Methods include regression analysis, Bayesian modeling, nonparametric methods, stochastic simulation, and machine learning. Software includes RStudio, VS Code, Jupyter, GitHub, and Overleaf.
